Business Online Banking is available virtually anytime day or night, seven (7) days a week. However, availability of Business Online Banking may be suspended for brief periods of time for purposes of system maintenance and updates. We will work to quickly resolve and minimize any interruptions in Business Online Banking.

Security Procedures

1st National Bank and its vendors are committed to providing a safe online banking system. Login information and the request and display of personal information are done via the use of encrypted SSL communication to prevent unauthorized access. Login attempts are monitored and three consecutive failed login attempts will result in your access becoming blocked. It will be necessary to contact our Internet Banking Department staff to request that it be unblocked or reset. Business Online Banking is for the use of authorized clients only. Individuals using this system without authority, or in excess of their authority, are advised that if monitoring reveals possible evidence of criminal activity, system personnel may provide the evidence of such monitoring to law enforcement officials. In the course of monitoring for individuals improperly using this system, or in the course of system maintenance, the activities of all users may be monitored. Anyone using this system expressly consents to such monitoring.

Your Business Online Banking password is used only for Business Online Banking transactions. You will be prompted from time to time to change your password for additional security. You may change your password at any time by selecting the "change password" option.

In order to maintain secure communications and reduce fraud, you agree to protect the security of your numbers, codes, marks, signs, public keys or other means of identification. We reserve the right to block access to Business Online Banking to maintain or restore security to our website and internal systems, if we reasonably believe your access codes have been or may be obtained or are being used or may be used by an unauthorized person(s).

Encryption

Business Online Banking uses the Secure Socket Layer (SSL) encryption technology for everything you do while using Business Online Banking. Your browser automatically activates this technology when it attempts to connect to Business Online Banking. Business Online Banking will currently support 128-bit key lengths, and the system will warn you when your browser is set to use a lower level of encryption.

Whenever SSL is securing your communications, the browser will typically indicate this secure session by changing the appearance of a small icon of a padlock at the bottom of the screen from open to lock. What this means to you is that your communications are scrambled from your browser to our servers at all times so no unauthorized party can read the information as it is carried over the internet.

Certificate Authority

The servers hosting Business Online Banking have been certified by a certificate authority to assure you that you are actually talking to Business Online Banking instead of someone pretending to be us. If you are using an older browser, such as anything prior to versions 4.0 on Netscape Navigator or Internet Explorer, you will see that the certificate authority key may have expired. If so, you will need to update it on your browser.

Cookies

During your use of Business Online Banking, our Business Online Banking service provider will pass an encrypted cookie to your computer in order to identify your computer during the session. This cookie does not identify you personally. We do not (and cannot) use cookies to collect or obtain personal information about you. This Business Online Banking cookie simply allows us to process multiple transactions during your session without requiring you to re-enter your password for each individual transaction. This cookie simply provides another level of security for Business Online Banking. The cookie is stored on your computer's hard-drive, identifying your computer while you are logged on. When you log off, close your browser, or turn off your machine, the cookie will be destroyed. A new cookie is used for each session; thus, no one can use the prior cookie to access your account. In addition to the security features described above, there may be other security related notices posted on our website from time to time. It is your responsibility to read all security notices.
